Principles For Value Stream Management

Possible Pitfalls

Controversies and challenges
of lean thinking

Processes bring people to a standard level of productivity.
Carefully designed processes create feedback loops.

Processes bring people to a standard level of productivity.

Carefully designed processes create feedback loops.

Process are dumb in nature. They work as designed.

They break.

People take over where processes fail.

Creativity and innovation come from freedom and problem solving.

Lean Thinking is more than just the focus of efficiency.

“

I am not here to be right,
I am here to get it right.

”

/ Brené Brown
